

# About R.E.C.I.

***Now that the State of Michigan has assumed the issuing of most electrical licenses, many people are asking, "Where is R.E.C.I.?"***

First off, our focus is on education and communications to enable inspectors, sign installers, masters, journeymen, and contractors to register their licenses and become certified remains in place.

Indeed, R.E.C.I.'s dedication to the goals of standardized practices, uniform electrical rules, offering educational forums and seminars, plus providing a choice in the code adoption process and in updating programs for license renewals – all this remains a strong, if not stronger, purpose than at any time in our over six decade history.

Started in 1939, the Reciprocal Electrical Council was in its very beginnings, an industry-sponsored program to unify and simplify electrical licensing throughout the State of Michigan.

***The mission of the Reciprocal Electrical Council is to provide education and training, to promote uniform code applications and inspections, to promote industry professionalism, and ensure the highest level of technical and administrative competence for individuals in the electrical industry.***

A non-profit organization, the Council is operated by an Executive Board drawn from industry members from various municipalities: Electrical Inspectors, Contractors, Detroit Edison, Electrical Manufacturing Representatives Association (EMRA), Suppliers, Sign and Fire Alarm Installers.

## About R.E.C.I.'s Continuing Education Series

This program is the first in a series of continuing education programs designed not only for electrical inspectors but for all electrical professionals. The Reciprocal Electrical Council believes there is a real need for programs such as these not only to provide electrical inspectors with Act 54 continued education credits but to provide uniform electrical code applications throughout our industry.

By participating in these forums you will be offered a rare opportunity to associate with code authorities, manufacturers, and electrical industry professionals throughout the region. Here you will be able to exchange new ideas, problems, and insights affecting our industry.

All programs will be located in the Metro Area and timed for maximum convenience. We believe that program costs for these events are reasonably priced and are of great value for your professional development.

Please join us as we move into the future with a variety of insightful and timely educational programs. We look forward to you joining us as we move forward in our ever changing industry.

## JOIN R.E.C.I. TODAY!

### YOU MUST REGISTER IN ADVANCE!

**Class space is limited so register early.**

Please visit our website at [www.recimi.org](http://www.recimi.org) for conference registration, maps, and information on future programs.
